

Heating and Refreshing system

for residential applications

Comfort

- > Performant heating system down to -20°C (without heaters)
- > Sweet warm spread throught the floor heating

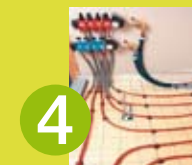

Low runnig Cost

- > DC inverter technology
- > High COP:
1kW consumed = 4 kW heating
- > Limited and intelligent operation of heaters

Applications

- > Floor: heating and refreshing

- > Low temperature radiators

- > Boiler replacement

- > Swimming pool heating system

Ecological

- > R410A: ozone layer respect
- > RoHS: choice of components respecting the environment
- > ISO 14001: manufacturing process respecting the environment

Outdoor Unit

- > Extract the heat from the outdoor air
- > Compact and silent, it can easily be installed in any environment

Indoor Unit

- > Transmit to the water, the heat received from the outdoor unit

Thermostat

- > Radio type, exclusive design and simple to use
- > Freeze protection
- > Comfort and reduced setting temperature
